ABSTRACT

This report summarizes test results statewide for tenth-grade students who took the New Jersey High School Proficiency Test (HSPT) in April, 1987. The HSPT consists of reading, writing, and mathematics sections, and must be passed as one of the requirements for a high school diploma. The tenth-grade students who were tested consisted of students who previously did not pass one or more sections of the test, and newly-enrolled tenth graders who did not attend a New Jersey public school as ninth graders. Results for each subject are presented, along with tables that show student performance for District Factor Group (DFG), 56 Urban Districts, and Regional Curriculum Services Units. Finally, the report contains district-by-district and school-by-school results grouped by DFG. Because 1987 was the first year the HSPT was administered to tenth graders, comparison cannot be made with performance from previous years. The percent passing for all tenth-grade students tested was 78.6% in reading, 64.6% in mathematics, and 73.5% in writing. Statewide, the percent of tenth-grade students tested who passed all three sections of the test was 59.2%. (KSA)

1986-87 High School Proficiency Test Results - Grade 10
Executive Summary

The New Jersey High School Proficiency Test (HSPT) consists of three sections--reading, writing, and mathematics--and must be passed as one of the requirements for a high school diploma. If a student does not pass one or more sections, he or she will receive additional instruction and will be retested on that section or sections next spring. The passing scores for the HSPT are: reading - 75, writing - 77, mathematics - 61.

The HSPT was administered on April 7, 8, and 9, 1987 to *81,014 students in grade nine and *32,618 students in grade ten. The population of grade ten students who were tested consisted of students who previously did not pass one or more sections of the test and newly-enrolled tenth-graders who did not attend a New Jersey public school as ninth-graders.

This report includes a series of tables reporting test results statewide for grade ten for reading, writing, and mathematics. (The performance of grade nine students is presented in a separate report.)

Results for each subject are presented, along with tables that present student performance for the following categories: District Factor Group (DFG), 56 Urban Districts, and Regional Curriculum Services Units (RCSUs). Finally, the report contains district-by-district and school-by-school results grouped by DFG. An explanation of District Factor Groups is included at the end of this report.

Results are presented for all grade ten students tested, as well as those who were retested and those who took the test this year for the first time. It is not appropriate to compare results of retested students with those who took the test for the first time. Moreover, because 1987 was the first year the HSPT was administered to tenth-graders, comparisons cannot be made with performance from previous years, as was done with test data presented in the grade nine report.

The HSPT scores in this report exclude special education students, limited English-speaking students, and students whose answer folders were voided.

Reading

Of the 14,088 students tested, 10,354 (73.5%) were students who were retested this year because they previously did not pass the reading section of the test, and 3,734 (26.5%) were newly-enrolled students who did not take the HSPT as ninth-graders. The percent of all tenth-graders who passed the reading section was 78.6. For retested students, the percent passing was 75.7. For newly-enrolled students taking the reading section for the first time, the percent passing was 86.8. The mean score for all tenth-grade students was 81.2; for retested students, it was 79.3; and for first-time takers, 86.2.

* This figure represents the total number of students to whom at least one section (reading, mathematics, or writing) of the HSPT was administered.

The score distributions indicate that a substantial percentage of the students who did not pass the test scored between 50 and 74, the category just below the passing score of 75. For all tenth-graders tested, 20.4 percent scored between 50-74, and 0.9 percent scored 49 or below. This was evident with retested students where 23.4 percent scored between 50-74 and 0.9 percent scored 49 or below, as well as with first-time takers where 12.2 percent scored between 50-74 and 1.0 percent scored 49 or below.

In the 56 Urban Districts, 70.2 percent of all students passed the reading section of the test. The percent passing for retested students was 69.2 and for newly-enrolled students taking the reading section for the first time, 74.9. The mean score for all students was 78.2; for retested students, it was 77.6; for first-time takers, 80.9.

In all other districts, the percent passing was 87.9. Among retested students, 84.9 percent passed the reading section; among newly-enrolled students, the percent was 92.9. The mean score for all students was 84.4; for retested students, it was 81.8; for first-time takers, 89.0.

Mathematics

The mathematics section of the test was administered to 21,063 students in tenth grade. Of that number, 16,824 (79.9%) were retested this year because they previously did not pass the mathematics portion of the test, and 4,239 (20.1%) were newly-enrolled students who did not take the HSPT as ninth-graders. This year 64.6 percent of all students passed the mathematics section. This includes 64.4 percent of retested students and 65.7 percent of students taking the mathematics section for the first time. The mean score for all students was 66.2; for retested students, it was 65.6; and for first-time takers, 68.4.

The score distributions indicate that 29.8 percent of all students scored between 41-60, the category just below the passing score of 61, and that 5.6 percent scored 40 or below. For retested students and first-time takers, the percent scoring between 41-60 was 30.4 and 27.5, respectively. The percent of retested students who scored 40 and below was 5.2; for first-time takers, the percent was 6.7.

In the 56 Urban Districts, 55.2 percent of all students passed the mathematics section of the test. Retested students had a passing rate of 56.5 percent; for students taking the mathematics section for the first time, the passing rate was 46.8 percent. The mean score for all students was 62.5. For retested students the mean was 62.9, and for first-time takers, 60.1.

In all other districts, 72.8 percent of all students passed the mathematics section of the test. For retested students, the percent passing was 72.1; for those taking the test for the first time, 74.7 percent passed. The mean score for all students was 69.3. Retested students and first-time takers had mean scores of 68.3 and 72.3, respectively.

Writing

The number of all students who completed both the essay and multiple-choice components of the writing section was 18,263. This includes 14,263 (78.1%) students who were retested and 4,000 (21.9%) students who took the writing section for the first time. This year 73.5 percent of all students passed the writing section of the test. Among retested students, 72.0 percent passed, and among first-time takers, 79.0 percent passed. The mean score for all students was 80.8. Retested students had a mean score of 80.3, and students who took the writing section of the test for the first time had a mean of 82.7.

The score distributions indicate that a high percentage of students who did not pass the writing section of the test scored between 65 and 76, the category just below the passing score of 77. For all students, 24.0 percent scored between 65-76, while 2.4 percent scored 64 or below. Among retested students, 25.7 percent scored between 65-76, and 2.4 percent scored 64 or below. Among students tested for the first time, 18.3 percent scored between 65-76, and 2.8 percent 64 or below.

In the 56 Urban Districts, 63.5 percent of all students passed the writing section of the test. Retested students had a passing rate of 63.5 percent; for students taking the writing section for the first time, the passing rate was 63.7 percent. The mean score for all students was 78.6. For retested students the mean was 78.6 and for first-time takers, 78.7.

In all other districts, 82.4 percent of all students passed the writing section of the test. For retested students, the percent passing was 80.9; for those taking the test for the first time, 86.3 percent passed. The mean score for all students was 82.7. Retested students and first-time takers had mean scores of 82.0 and 84.5 respectively.

On the essay component of the writing section, the statewide mean was 7.4 for all students, 7.6 for retested students, and 6.7 for students tested for the first time. The score distributions indicate that 62.2 percent of all students had essay scores between 8 and 12. For retested students, the percent was 63.0, and for first-time takers, 59.9.

In the 56 Urban Districts, the mean score was 7.2 for all students, 7.3 for retested students, and 6.6 for students taking the HSPT for the first time. In all other districts, the mean score was 7.5 for all students, 7.9 for retested students, and 6.8 for students taking the HSPT for the first time.

On the multiple choice component of the writing section, the statewide mean was 79.6 for all students, 79.1 for retested students, and 81.6 for students taking the HSPT for the first time. The score distributions indicate that 94.6 percent of all students scored 61 or above, while 94.4 percent of the retested students and 95.1 percent of the first-time takers scored in this range.

In the 56 Urban Districts, the mean score was 76.5 for all students, 76.6 for retested students, and 76.0 for students taking the HSPT for the first time. In all other districts, the mean was 82.5 for all students, 81.8 for retested students, and 84.3 for students taking the HSPT for the first time.

Summary

The percent passing for all tenth-grade students tested was 78.6 in reading, 64.6 in mathematics, and 73.5 in writing. The number of students who did not pass each section of the test was 3,009 in reading, 7,448 in mathematics, and 4,835 in writing. Statewide, the percent of grade ten students tested who passed all three sections of the test was 59.2.

COMMUNITY TYPES AND DISTRICT FACTOR GROUPS

A. Community Types

1 — Urban Center (UC): densely populated with extensive development.
2 — Urban-Suburban (US): near an urban center but not as highly developed, with larger residential areas.
4 — Suburban (S): predominantly single-family residential within a short distance of an urban area.
5 — Suburban-Rural (SR): rapidly developing area, but still large tracts of open land available for development.
6 — Rural (R): scattered small communities and isolated single-family dwellings.
7 — Rural Center (RC): high-density core area with surrounding rural municipalities.
8 — Rural Center Rural (RCR): small developed core area surrounded by rural areas.
9 — Vocational (V): primary emphasis on vocational training under a separate educational jurisdiction.
0 — Regional District (RD): an educational jurisdiction established to service several surrounding communities.

B. District Factor Groups

The District Factor Group (DFG) is an indicator of the socioeconomic status of citizens in each district and has been useful for the comparative reporting of test results from the statewide testing programs. The measure was first developed in 1974 using demographic variables from the 1970 United States Census. Since that time, however, the socioeconomic status of some districts may have changed considerably. Therefore, an updating of the DFG designations was needed.

The DFG's have been updated using seven socioeconomic variables from the 1980 United States Census. These are:

(1) Educational level

1 = elementary (0-8 years) through high school (1-3 years)
2 = high school (4 years)
3 = college (1-3 years)
4 = college (4 years)
5 = college (5+ years)

(2) Occupational status

1 = laborers
2 = service workers (except private and protective)
3 = farm workers

4 = operatives and kindred workers
5 = protective service workers
6 = sales workers
7 = clerical and kindred workers
8 = craftsmen, foremen, and kindred workers
9 = quasi-professionals
10 = managers, officials, and proprietors
11 = old and new professionals

(3) Density

number of persons per household

(4) Urbanization

percent of district considered urban

(5) Income

median family income

(6) Unemployment

percent of those in the work force who received some unemployment compensation in 1979

(7) Poverty

percent of residents below the poverty level in 1979

The variables were combined using a statistical technique called principal component analysis, which resulted in a single measure of socioeconomic status for each district. Districts were then ranked according to their value on this measure and divided into 10 equally-sized groups. Hence, DFGs range from A (lowest socioeconomic districts) to J (highest socioeconomic districts). In addition, special service districts are not included and all vocational districts are designated DFG "V".
